THE FLOOR IS LAVA

BEFORE

WITH magic leap

EVERY TRIP TO THE FRIDGE IS AN ADVENTURE!

🔥 Your childhood imagination realized!

🔥 Don't step in the lava!

🔥 Imagine a keynote with an executive hopscotching across the stage!

GAMEPLAY - EXPERIENCE

🔥 Don't step in the lava or you will take damage! (Using Magic Leap position for approximation)

🔥 Platforms rise and sink… don't linger or you'll get burned!

🔥 Fireballs, Dragons, and other hazards will rise from the lava and try to block your progress.

🔥 A new layout every game. How long can you survive?

🔥 A water pistol is your lifeline, use it to cool the lava and create platforms, or keep your platform from sinking…but be warned…your ammo is limited.

magic leap

MILESTONES

🔥 TIMELINE: 6 Months

🔥 M1 Alpha: Mapping of Lava, Fire, and creation of dynamically generated platforms
